

# MY DRAWING of a Comb-crested Jacana

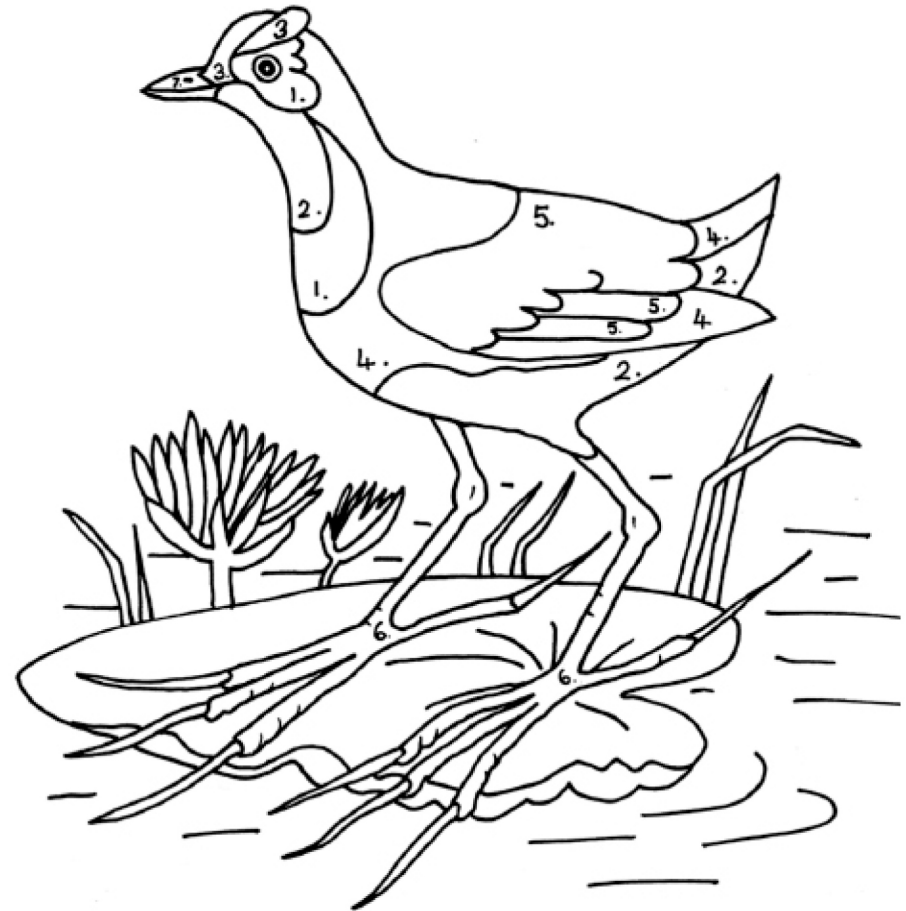

## DID YOU KNOW?.....

They can move their eggs and babies by tucking them under their chin and walking across the lily pads! They freeze when approached!

☐

I have seen a Comb-crested Jacana.

# COMB-CRESTED JACANA

I am a threatened species because of wetlands being drained for agriculture and by introduced plants choking out the native plants.

## Colour by numbers

1. golden brown

2. white

3. red

4. black

5. brown

6. olive green

BEAK - greenish yellow

EYE - yellow

Maximum  
size  
**23cm**  
long
